EXPERIENCE

- SWE Co-op Intern, AlgoUniversity (Y-Combinator Backed)** Summer 2024
 - Architected and developed a Online Judge Platform using the MERN stack.
 - Engineered scalable RESTful APIs with Node.js/Express.js, optimizing database queries which reduced average API response times by **30%** for critical endpoints.
 - Integrated secure auth using **JWT** with **RBAC** {role-based access control} for users and admins.
 - Authored and maintained comprehensive API documentation for mutiple endpoints.

PROJECTS

- Terminal Chat App** Code
 - Node.js, Express.js, Socket.IO, MongoDB, JWT
 - Developed a real-time terminal chat application with secure user authentication and persistent chat rooms.
 - Leveraged Socket.IO for instant, bidirectional messaging and MongoDB for robust data storage.
 - Implemented a Node.js backend handling authentication (JWT) and room management.2025
- Bitcask** Code
 - C, Key-Value Storage, Database, Hashtable
 - Wrote bitcask, a log-structured hash table for fast key/value data storage in C.
 - Designed and implemented a data architecture that supported a throughput of 5,000 messages per second.
 - Wrote a custom Hashtable with open addressing and linear probing.
 - Uses modern practices such as arena allocator, fat pointers for strings and extensive error handling.2024
